**Telegraph and Telephone
Mobile, Ala. GREENWOOD 9-4564**

Member of American Association of Nurserymen and Other State and Local Organizations to Promote the Cause of the Industry

Our nurseries are located at Semmes on U. S. Highway 98 fifteen miles northwest of Mobile. We have over 14,000 square feet of greenhouse space for propagation only. We have more than 65,000 square feet of hotbed space for growing plants in. We use most of these for Azalea liners, all equipped with an automatically controlled heating system. We have more than thirty-five acres of lath house space, all under overhead irrigation where we grow Azaleas, Camellias, Ilex, Magnolias, and many other items. We are now growing many items in containers. We know that we have the finest stock available, and wish you could see it. We are very proud of our container-grown stock. It has been sheared many times and grown right. There may be a little difference in price but there is also a difference in quality. This applies also to our lining out stock.

One section of our propagating houses.

R. O. BLACKWELL, JR.
President and General Manager

**MEET SOME OF
THE PEOPLE YOU
DO BUSINESS WITH
HERE AT BLACKWELL'S**

N. A. BLACKWELL
Arnell is Superintendent and Assistant
Manager

J. D. MILLER
J. D. is propagator and grower. He is responsible for the many thousands of cuttings we root and grow into liners.

J. S. TATE
Buddy has charge of the growing of all our container-grown stock.

WALTER W. MALONE
Walter has charge of our packing shed and is responsible for shipments going out.

AZALEAS •

THIS year we have our usual wonderful lot of Azaleas to offer. They have been sheared many times and are very compact. We are growing more and more Azaleas for florists' use, and certainly would like to take care of your requirements. No one can furnish the high quality Azaleas we ship at a lower price, due to our volume of production. We would appreciate the opportunity to prove this to you.

Azaleas can be moved almost anytime during the year, but for best satisfaction it is much better to get your plants before they start blooming. You will get the benefit of the blooms the first year and they will make a better display for your clients.

For nurserymen and growers we are offering this year a million and a half Azalea liners. We keep them growing all winter in our heated frames in specially prepared soil. They are well rooted and branched for spring delivery. We usually start shipping these liners about the last week in March, but for greenhouse operators, where space is available it is better to get them in early February. Because of the quality of our plants and the very low price at which we are offering them, we are usually booked up early in the season. We urge you to order early.

Hot beds where we grow Azalea liners. These beds are equipped with a hot water heating system for protection.

AZALEAS

Continued

KURUME AND PERICAT AZALEAS

These are most popular as they are used extensively as pot plants and also in landscaping for borders as well as mass planting in beds. As a pot plant there is nothing we know of that is superior. We urge you to try a few if you are not already using them.

China Seas. Fast grower, nice pink hose-in-hose. Excellent for late forcing.

Christmas Cheer. Hose-in-hose; small deepest red. Small foliage; compact growth.

Coral Bells. Hose-in-hose; small, bell-shaped flowers of a beautiful shade of pink. Small glossy foliage; very compact growth. The favorite of florists for pot culture.

Glory. Fast growing nice salmon pink hardy variety. Flowers almost same color as Salmon Beauty, but not quite as large. Very profuse bloomer.

Hexe. Hose-in-hose; large, deep red. Excellent dwarf compact growth. Very much in demand.

Hexe de Saffalare. Hose-in-hose similar to above except larger. New and very popular.

Hinodegiri. This is a very popular bright red variety. The blooms cover the plant in such a manner that you can hardly see a leaf when in full bloom. Compact, slow growth. Very hardy.

Hino-Crimson. This variety is similar to Hinodegiri, but faster grower. Hardy, but not as hardy as Hinodegiri.

Marjorie Ann. Fast growing Pericat similar to Sweetheart Supreme, except flower bright salmon. Very good for forcing.

Pink Supreme. (Pink Pericat) Beautiful rose-pink sport of Mme. Pericat.

***Red Wing.** Pat. No. 1159. 10 cents each royalty fee. Beautiful large red Azalea which is an excellent pot plant variety similar to Hexe, except a much larger flower. Not quite as hardy out doors as Hexe de Saffalare.

Salmon Beauty. Hose-in-hose; large, salmon color. Compact growth. Very showy plant and an excellent variety for pot culture.

Snow. Hose-in-hose; pure white flowers cover the plant. Fairly large, dark green leaves. Very popular with the florist.

Sweetheart Supreme. Salmon-pink. Keeps well. Very fine.

Camellia Japonica

Despite the fact we have had a shortage of blooms the past few years, Camellias are still very popular and are being planted in great numbers. We are finding they are hardier than most people think and at today's prices they are in reach of all home owners.

There is and always will be quite a lot of argument in regard to Camellia names. We are listing each variety by the accepted name used by the majority of growers. No doubt some of these will be changed in the years to come as some are being changed now, and when this happens we will always list each variety by as many names as we know it to be sold under. This will prevent you from duplicating varieties.

We are trying to grow all of the better varieties, and not trying to introduce a lot of new seedlings that are good only for understock. We hope to increase our list of varieties as long as we can find new ones to buy that we believe are worth growing. We use several thousand plants each year for understock and we also use many **Camellia Sasanqua** for understock and find it sometimes works better than **Camellia Japonica**.

We are listing our Camellias in groups for convenience in pricing. The scarcity, demand, and quality of the blooms determine the group they are listed in.

"CINDERELLA" WINS FIRST ALL-AMERICAN CAMELLIA AWARD 1957 AACS Winner Makes Debut After Extensive Testing

CINDERELLA, a spectacularly beautiful new camellia japonica, is the All-America Camellia Selection for 1957, the first camellia ever to be so honored.

The All-America Award is the highest distinction attainable and is given only to the best new camellia. To achieve this top recognition, **Cinderella** won against the finest new varieties developed in the United States and abroad in extensive three-year competitive trials conducted by All-America Camellia Selections.

All-America Camellia Selections, known also as "AACS", was established in 1950-'51 and incorporated in 1952 as a non-profit organization, by a group of America's leading hybridizers and nurserymen. Patterned after but entirely independent of other All-America testing associations, its primary function is to provide for the scientific pre-testing of new camellia varieties and to encourage only the introduction of those of quality and distinction, garden proved and sure to perform well anywhere camellias may be grown in the United States.

All-America Camellia Selections enables the public to know which are the best new camellias. The ever-increasing popularity of camellias, favorites for generations, is at an all-time peak and has led to the haphazard introduction each year of vast numbers of new seedlings and sports, usually at prohibitive prices. A few of these newcomers are very good but all too many are neither different nor better than existing kinds and, until now, neither the public nor the nurserymen have had any reliable way to determine which are worthy.

As an organization, All-America Camellia Selections has no plants; its role is research and preintroductory testing. The AACS program, however, benefits both the gardening public, who will be able to acquire these improved kinds in quantity and at reasonable prices, and the nurserymen, who will be able to concentrate upon varieties of proven merit.

Cinderella is noted for its flower formation, which is unique and quite different from that of camellias in commerce generally. Development from the long pointed buds progresses slowly and the flower unfurls in a manner notably distinct from the conventional rose bud opening.

Each rose pink petal, veined with deep crimson and bordered generously with a marble white edging, is crinkly textured and wrinkled almost like a new baby's skin. Petal edges are notched and lacinated or fimbriated.

The flower form and coloring instantly reminds one of an old-fashioned Valentine with many layers of lacy ruffles. The enchanting blooms of this outstanding new variety usually average about four inches in width and three inches in depth and are produced freely upon a vigorous and stocky plant. The healthy plants bloom well at an early age, producing buds which are well spaced over the plant and are not clustered.

Cinderella possesses greater hardiness than most camellias. The plants

Cinderella possesses greater hardiness than most Camellias. The plants suffered little damage during the sever killing freeze which struck the Pacific Northwest during November, 1955, when no previous frosts had occurred to induce dormancy and when the Douglas firs showed severe needle drop. Reporting upon two test plants of **Cinderella**, the Director of the AACS Trial Garden, located at Lewis and Clark College, Portland, Oregon, found only one tip burned on both plants and that, although flower buds quite naturally were gone, growth buds were 90% good.

In addition to the test garden at Portland, All-America Camellia Selections has established nine other official gardens and, as necessary, may increase this number. Existing gardens are located at Norfolk, Virginia; Atlanta, Georgia; Charleston, South Carolina; Fort Valley, Georgia; Semmes, Alabama; Lafayette, Louisiana; San Fernando, California; Sacramento, California; Fresno, California; and Portland, Oregon, to afford a good cross-section of soil types and differing climates. Where possible, gardens are at educational institutions or on private grounds; a few have been placed at nurseries.

Each garden is supervised by a Director. Three gardens at nurseries are supervised by prominent nurserymen, none of whom may act as an official judge. Indeed, qualified judges must be amateurs, completely dissociated from any commercial nursery firm. Three judges serve at each garden and are requested to evaluate independently the competing entries, to provide a broad basis for comparing the merits or demerits of an entry. These judges, each a camellia expert, were chosen for their knowledge of and devotion to camellias.

Cinderella and other entries were studied and scored under actual growing conditions in each area. A uniform point system, differing slightly for the several types of camellias, was used to evaluate such important factors as hardiness, growth characteristics; foliage; profusion, duration, and quality of bloom; and novelty or features which differentiate a variety from others already in commerce.

Entries were neither pampered nor neglected but received care equivalent to that given the average home planting.

At the conclusion of the exhaustive trials, scores and comments of the judges were submitted to the National Camellia Jury for final consideration.

Through open competition against a field of the world's finest new camellias, in one of the most thorough and accurate horticultural testing systems yet devised, **Cinderella** is recommended as truly worthy of the country's highest camellia honor—an All-American Camellia Selections Award.

12-18 inches, heavy liners	50.00	

Oriental Magnolias

Our stock of these fine Magnolias is much larger than ever before, and they are about the nicest we have ever seen anywhere. Our liners are especially nice and we recommend them very highly. Most of these Magnolias are hardy in nearly all parts of the United States, and make beautiful trees for Spring flowering.

All liners are shipped bare root and we recommend shipping the larger sizes in this manner when the distance is very great. They can be moved safely in this manner, and can be shipped where B&B would be almost prohibitive.

All our Oriental Magnolias should be shipped out before February first. They come into flower and growth buds soon after and would be harder to transplant. If you have some place like a bulb cellar where you can keep them above freezing, yet cold enough so they won't start new growth, you can hold them fine. 38 to 45 degrees is about perfect.

Magnolia Rustica Rubra. Large flowers of dark reddish purple. Very fast grower and excellent variety. Later bloomer than Soulangeana.

Magnolia Soulangeana. Very hardy, fast growing, and one of the most sought-after plants for use all over the United States.

Magnolia Soulangeana Nigra. Dark purple. A late bloomer and not quite so hardy as Soulangeana.

Prices of above Oriental Magnolias.

LINING OUT STOCK

When we established this nursery in 1938, we decided to specialize in lining-out stock. We have done this and are known as the producer of the highest quality liners of anyone in this section. Whether it be Azaleas, Camellias, Ilex, Magnolias, or any other nursery stock we grow, we produce the best. Repeat orders and more and more new accounts each year are our best testimonials. We are improving our quality and methods of production each season. We are very proud of our packing and feel the extra time we consume to doing an excellent job is well spent.

Container Grown Nursery Stock

Our container-grown nursery stock is the very best quality produced in the South. We have given very careful attention to soil mixture, feeding, watering, and general care. Being able to offer this wonderful stock is our reward. We are very proud of this container-grown stock and justly so. We realize that our supply will not fill the demand, but we will endeavor to take care of as many customers as possible. Early ordering will help us and will assure you a much better selection.

Some of our stock is illustrated in same size container as offered.

Our Business Terms

PRICES. All our prices are net and due by the 10th of the month following purchase. Packing charges are to be added and are based on actual cost. If cash accompanies order, we will allow a 3% discount and we will absorb the packing cost ourselves. Less than 250 plants take the 100 rate. 250 or more, take the 1000 rate.

CHARGE ACCOUNTS. From unknown persons who have not established credit with us, we ask for well-known trade reference and time for investigating.

C.O.D. SHIPMENTS. Must be accompanied by 25% deposit and will be considered as cash shipments. If you want us to hold certain items for you, we require a deposit of 25%.

SHIPMENTS. Please specify by what method you want your order shipped. We will endeavor at all times to send out all orders as near the date specified as possible and will do everything in our power to insure satisfactory delivery to our customers, but our responsibility ceases upon delivery to carrier in good condition, insofar as damages in transit are concerned. However, we are here to please our customers and will at all times do all we possibly can to help, should you have to file claim for any damages. Should your shipment be delayed or damaged in transit please file claim with transportation company at once.

If you have any reason to complain, or if there is any mistake in the order, please let us know at once so that we can rectify the mistake.

It is to be thoroughly understood that we accept any and all orders with the provision that they shall be void, should any injury befall our stock over which we have no control. All orders are subject to any new Government regulations.

REFERENCE. As to our standing and responsibility, we refer you to any bank or business house in Mobile, and the better known nurserymen and florists in this country.

THE BLACKWELL NURSERIES, INC., warrants to the extent of the purchase price that nursery stock sold is true-to-name and as described within recognized tolerances. Seller gives no other or further warranty, express or implied, and will under no circumstances be liable for more than the invoice value at the time of purchase.
